

Sponsored by the UCI Center for the Study of Cannabis
in cooperation with U.S. Representative Lou Correa

Cannabis and Post-Traumatic Stress Disorder: An Assessment of the Evidence

Wednesday, September 5, 2018
Noon-1:30 p.m.

2456 Rayburn House Office
Building (HOB), Washington, DC

Moderator: Daniele Piomelli, Professor of Anatomy and
Neurobiology at the UCI School of Medicine and Director
of the UCI Center for the Study of Cannabis

Every day, 20 veterans take their own lives.

Post-traumatic stress disorder (PTSD) plays
a significant role in this devastating tragedy.

Increasing numbers of veterans are
turning to cannabis for help. Scientists
have made progress in addressing its
efficacy, but more research is needed.

This panel will assess the current scientific
evidence that may lead to the use of cannabis
and related products in the treatment of PTSD.

*Food and beverages will be offered
at this widely publicized event.*

Panelists

- **Christine Rabinak, Ph.D.**, assistant professor, Wayne State University
- **Kent Hutchison, Ph.D.**, professor, University of Colorado, Boulder

Guest Speakers

- **U.S. Representative Lou Correa** (CA-46-D), member of the Veterans' Affairs Committee
- **U.S. Representative Jared Polis** (CO-02-D), founding member of the Congressional Cannabis Caucus
- **U.S. Representative Dana Rohrabacher** (CA-48-R), founding member of the Congressional Cannabis Caucus
